Blackout

Tapped in, Tapped out
It gets so cold inside this empty hole I'm in
Lay down, black out I know I'll never make it through this pain I am in

It's always the same X2

I can feel it growing inside of me
Tried to make it all just go away
I can't fight it cuz I'm far from better
Let's just make all of it go away

Instrumental guitar solo

Break in, break down another battle waging inside me again
Shut in, shut out I'm left with nothing
I'm my only other friend

It's always the same X2

I can feel it growing inside of me
Tried to make it all just go away
I can't fight it cuz I'm far from better
Let's just make all of it go away

instrumental guitar solo

Tapped in, Tapped out
It gets so cold inside this empty hole I'm in

It's always the same X2

I can feel it growing inside of me
Tried to make it all just go away
I can't fight it cuz I'm far from better
Let's just make all of it go away

Away x3
