

Lost

October Project

I walk the beach a day so cold
The waves could almost not unfold
Completely to blue
A hill of sand and feet of snow
With miles to kill and hours to go
To be with you
To be with you And I am
Lost in the feeling you are here with me
In a universe
Where I'm lost and I'm dreaming
But it's beautiful just to be with you
To be with you
In standing still the hills have learned
To weather every bitter turn
Or promise of rain
But nothing goes and nothing stays
Without the pain you lose the way
You came to be
You came to me And I am
Lost in the feeling you are here with me
In a universe
Where I'm lost and I'm dreaming
But it's beautiful just to be with you
To be with you
I walk the moon a darker side
The only stars I see have died
Already they shine
A weird unsteady after-light
As if the stars were here tonight
To be with me
To be with you I could be
Lost in the feeling I am not alone
In the universe
If I'm lost and I'm dreaming
It is beautiful just to be with you
To be with you
