Stones Around the Sun

Lewis Watson

love had spiralled down
that sighing sound, was too loudwar was breaking out
you found your crowd, and i turned roundwhere did you go?
i looked away, and you were gone
you didnt say, where did you go?
i dont know
(x2)when you pull back, pull back far enough
we are only stones around the sun
(x2)life came tumbling down
you know i tried, to fight my way outsomewhere in this cloud
a piece of sky, i heard aboutwhere did you go?
i looked away, and you were gone
you didnt say, where did you go?
i dont know
(x2)when you pull back, pull back far enough
we are only stones around the sunwhen you pull back, pull back far enough
we are only stones around the sunwe are only stones around the sun
