

Summer Didn't Change a Thing

White Lies

Counting down the days
But the rain won't leave my room
It's so heavy today
It promised to get away
But somehow it never do
And I know it won't change Trying to clear my head
I don't wanna clear my love for you
And see it falling that way
Don't know how to say
That I don't know what to do
But I feel out of place
Summer didn't change a thing
And it all still hurts
Summer didn't change a thing
It will always burn
It will always hurt
Summer didn't change a thing
It will always hurt Summer didn't change a thing
Summer didn't change a thing
Summer didn't change a thing Looking for a break
For the heat to heal my blues
Even if for a day
I told you I'm the same
You just said I'll see you soon
But you're not here today
Summer didn't change a thing
And it all still hurts
Summer didn't change a thing
It will always burn
It will always hurt
Summer didn't change a thing
It will always hurt Summer didn't change a thing
Summer didn't change a thing
Summer didn't change a thing (And I got nothing to say)
Summer didn't change a thing
(And I got nothing to do)
Summer didn't change a thing
