

Radio Days

Open Hand

Let's just say now that I know when
I found you there right next to him
I found out why you lied
You said you loved me the other night I walked in
I saw you sitting there
you looked at me
you know what i'm thinking
so don't say that I don't care Let's just say now
that I'm not here
before myself he'd better say
in your eyes I have died
be on my own
live my own life I know now that I'm ok
Take my life back today
I know now I'm on my way
this pain won't fall away
Far from you is where I'd rather be
is where I'd rather be
is where I'd rather be
is where I'd rather be
Far from you
Far from you
