Know One

Ãœnloco

Look back inside Will I ever realize That this thing It's not the same This man was me Everything that I relate But then I suffocate Life that we knew it I shed my skin I bleed my life I'm dying deep within Cause everything's my fault But then I suffocate Everything that I relate It's all your Life that we knew it And here I can find out that You're nothing better You just don't care And here I can find out that Left outside Left to dry Everything's my fault But then I suffocate Don't know all the reasons why It's not the same Everything that I relate Life that we knew it And here I can find out that You're nothing better And here I can find out that You just don't care And here I can find out that You are nothing better You are nothing better And here I can find out that And here I can find out that You just don't seem to care I'm here, I'm here I'm here in soul It's all I've got You give, I take this soul from me And here I can find out that You're nothing better And here I can find out that You just don't care [Thanks to kingxeratul@hotmail.com for these lyrics]
