Aviator

A Telemetry

leaving the surface
taking off to a wide open lead
moving quickly gathering speed
you cheat the gravities yield

feeling the power
it pins you to your seat
check back to the tower
all is go on you flow

fearless aviator fly
gonna spread your wings aloft
and cut the highest cloud

fearless aviator aviator
taken to the blue
never gonna tear you down
or stray you from that path you flew

adrenalin drugs you
hands are moist you take the last leg on
no time to rest ripping through air
you challenge one more ego

getting slammed by g force
stomach in your throat
no chance to lose course
all is go on you flow

high on lift - no cares
gliding through the atmosphere
engine sings ground disappears
on go to the horizon

never back up - never break
busting forward milking fate
no loss for freedom of will
on go with arriving
