

Wait For Evolution

De Staat

waste, you make another face.
just keep the pedals down, come on and move it.
don't make another sound, i'll put you to it
it ain't the question who, it is the question why.
it's what you wanna do, i hope you wanna die. baby girl, baby.

chorus:

god this feeling, wounds are healing.
when you feeling love.
so stop your nealing. get your healing.
hush your god above.

stop following your dreams, you'll hook up with them later. and so it seems.
it ain't the question who, it is the question why.
it's what you gonna do, i hope you wanna die.

wait for evolution, for evolution.
take this reputation of emulation.
wait for evolution, for evolution.
take this reputation, so let's get dieing here!

god this feeling, wounds are healing.
when you feeling love.
so stop your nealing. get your healing.
hush your god above.

(instrumental)

god this feeling, wounds are healing.
when you feeling love.
so stop your nealing. get your healing.
hush your god above.
