Keep Yourself Warm

Cairn String Quartet

My hole, I'll get my hole, I'll get my hole
Get my hole, get my hole and I'll find out more
It's a choo choo train, a rocket launch
If we have a hormone race
I'm bound to finish firstCan you see in the dark?
Can you see the look on your face?
The flashing white light's been turned off
You don't know who's in your bedIt takes more than fucking someone
You don't know to keep warm
Did you really think that a fuck at half speed
You'll find your love in a hole?Oh, you won't find love in a
Won't find love in a hole
It takes more than fucking someone
To keep yourself warmI'm drunk, I'm drunk
And you're probably on pills
If we've both got the same diseases
It's irrelevant, girlAnd the room fills with steam
Oh, evaporates, disappears
My point of entry is the same way
That I leaveCan you see in the dark?
Can you see the look on your face?
The flashing white light's been turned off
You don't know who's in your bedIt takes more than fucking someone
You don't know to keep warm
Did you really think that a fuck at half speed
You'll find your love in a hole?But, you won't find love in a
Won't find love in a hole
It takes more than fucking someone
To keep yourself warmYou won't find love in a
Won't find love in a hole
It takes more than fucking someone
To keep yourselfSee in the dark
Can you see the look in your face?
The flashing white light's been turned off
You don't know who's in your bedIt takes more than fucking someone
You don't know to keep warm
Did you really think that a fuck at half speed
You'll find your love in a hole?
