

Remember When

Hatebreed

Remeber when is a phrase for fools
The here and now is what I choose
It was better then is a saying I dread
Will they ever under-fucking-stand

I don't regret

Not one single shred

I let the weak lament

Now I'm eager to forgetThe past is like a virus to some it infects

A vestige of thoughts

That I once had

Now they want to tell me that it's not the same

Some of us follow a path they can't see

Remeber when is a saying I reject

What if today is all that we get

It was better then well than I don't recall

Will they ever stand or just crawlI don't regret

Not one single shred

I let the weak lament

Now I'm eager to forget

Will they ever...

Will they ever...

Will they ever...

...under-fucking-stand?!(Outro)
