

# Better To Be Loved

Francesco Yates

Love me, a little love ain't never hurt nobody  
Make believe that you were never hurt before  
And let me change your mind Hold me, you don't have a reason to be lonely  
We can break the dawn into a sea of light  
And set the world on fire 'Cause when everything is frozen  
And you cannot feel a thing  
I'll be there with arms wide open  
And I'm hoping you will see If you really need it  
You got to believe it  
Just reach out and feel it  
It's better to be loved  
And once you come near it  
You don't have to fear it  
Just want you to give it  
It's better to be loved  
It's better to be loved  
It's better to be loved I'll show ya,  
There is nothing wrong with starting over  
Everything that's happen is a grain of sand  
Just blowing in the wind  
Let me move you, let me set your body into motion  
We can ride the rhythm and we'll dance until  
The darkness finds its end Everybody needs affection,  
Everybody has a heart  
I'll point you in the right direction  
I can give you a place to start If you really need it  
You got to believe it  
Just reach out and feel it  
It's better to be loved  
And once you come near it  
You don't have to fear it  
Just want you to give it  
It's better to be loved  
oh oh oh oh oh oh  
It's better to be loved  
It's better to be loved
