# Big Sky

## Abra Moore

You say youre tired of this circus life
Tired of the freaks and the colored lights
Come on, come on the night is young
Its too late to change your mind, you cant turn back nowSo high, so high just you and me and the big skyClose the door and shut off the lights
At 6 oclock well be takin' flight
Hold on, hold on and then relax
Tell everyone we're gone and we wont come backSo high, so high just you and me and the big sky
Thats all we are, thats all we are, its all forever
Thats all we are, thats all we are, its all foreverSo you're tired of this crazy, crazy life
And no one can save you
How long, how long can this go on
You only get one chance and then you're goneSo high, so high just you and me and the big sky
Its all right, its all right
So high, so high just you and me and the big skyThats all we are, thats all we are, its all forever
Thats all we are, thats all we are, its all forever
Thats all we are, thats all we are, its all forever
Thats all we are, thats all we are, its all foreverIts all right, its all right
