

Hot to the Touch, Cold on the Inside

Fall Out Boy

They've got us surrounded; we're in their sights
But they're not taking us alive
Hot to the touch, cold on the inside
But they're not taking us alive They've got us surrounded; we're in their sights
But they're not taking us alive
Hot to the touch, cold on the inside
But they're not taking us alive If I was still around
Walk me through
I am your savior now
And I'm your secret too Carry them alive
Fall off the case again
You're just a black widow
Who fell in love with herself They've got us surrounded; we're in their sights
But they're not taking us alive
Hot to the touch, cold on the inside
But they're not taking us alive If it's never been broken
Can't believe in it
Now you're just a problem
For someone else to fix If I was still around
If I'm near you
I am your savior, yeah
I am your secret too They've got us surrounded; we're in their sights
But they're not taking us alive
Hot to the touch, cold on the inside
But they're not taking us alive Oh shitty crap shit...
