

# Sleep Machine

## Phantom Planet

Some things melt away  
As night dissolves to day  
Some things only stay  
As silent darkness slowly kills me, ooh ooh I turn to you  
And stir your blank expression You're the one for me  
Help me get to sleep  
(Nighty-night goodnight)  
Something isn't right  
It seems that every night, I need you More and more  
You take me away  
More and more  
I need you to stay More and more  
Distract me from the instant lost of light  
More and more  
I need you tonight Come let's go for awhile  
And pretend you're mine for awhile  
Come let's go, yeah More and more  
You take me away  
More and more  
I need you to stay More and more  
Distract me from the instant loss of light  
More and more  
I need you Good night
