

Ain't It Strange How Things Turn Around

Perfect Stranger

Well I saw you out with my own best friend
You were looking at him with passion and sin
I was stung I was cut I was bind to the ground
Ain't it strange how things turn around
Ain't it strange how things turn around

I fought with the demons that come in the night
When I lost my girl and the world with my life
But salvation came just before I went down
Ain't it strange how things turn around
Ain't it strange how things turn around

New love is the demon you do not expect
It's the fore cancellation of every old debt

(bridge)

She made me feel like living again
So we built a fire in through your memory then
Like a Phoenix you rose from the ashes of doubt
Ain't it strange how things turn around
Ain't it strange how things turn around

Now here you are back at my door
That look in your eyes that I've always longed for
Guess you'll be the one with the broken heart now
Ain't it strange how things turn around
Ain't it strange how things turn around

New love is the demon I did not expect
It's the fore cancellation of every old debt
It's the road from rock bottom to reach high and grand now
Ain't it strange how things turn around
Ain't it strange how things turn around

Ain't it strange how things turn around
