Side By Side

Thunderstone

Time has come, now it's our turn
To start building up our way to the stars
Here and now, scream and run
For the dreams we have and for the visions
That we have fought so long years after yearsNo hesitation we're heading forward
There's nothing that could stop us now
We are here to stay, never fading awayWe have a power and will, dreams to fulfill
And the hunger is growing day by day
Together we will ride to the sky, high above
United we will march through the lands, side by sideWe are as one, we breath the same air
We walk the same endless road, we share it all
Joy and sorrow no limitations as long as the grip will hold
There is only one way to go, full speed ahead we are rolling overNo hesitation we're heading forward
There's nothing that could stop us now
We are here to stay, never fading awayWe have a power and will, dreams to fulfill
And the hunger is growing day by day
Together we will ride to the sky, high above
United we will march through the lands, side by sideWe have a power and will, dreams to fulfill
And the hunger is growing day by day
Together we will ride to the sky, high above
United we will march through the lands, side by side
