

Broadcast To The World

Zebrahead

Brace yourself kid for the final collapse
'Cuz the world is spinning fast coming off its axis
Fight to survive, ode lay essay
And the kids with the guns shout, "Out of my way!" Sex and violence are here to stay
Broadcast to the world
Out of control
Broadcast to the world
Out of control
Broadcast to the world
Out of control I want to have it all and I want it right now
I want to have it all and I want it now So here we go reload another round implode
We're spinning now until our heads explode
And so I guess we know how far we all can go
We're on a mission to destroy the world we know The saints and the sinners have an identity crises
That spreads like a virus, multiplies and lysis
Down to the bottom looted graves they turn
Eat the razorblade apple open a can of worms
Narcotics on the weekends as the city it burns Broadcast to the world
Out of control
Broadcast to the world
Out of control
Broadcast to the world
Out of control I want to have it all and I want it right now
I want to have it all and I want it now So here we go reload another round implode
We're spinning now until our heads explode
And so I guess we know how far we all can go
We're on a mission to destroy the world we know You know we all are to blame
You know we all are to blame Broadcast to the world
Final collapse is on
Heaven and hell collided Broadcast to the world
Final collapse is on
We stand d-d-divided Broadcast to the world
Final collapse is on
Heaven and hell collided Broadcast to the world
Final collapse is on
We stand d-d-divided
Divided, divided, divided, divided I want to have it all and I want it right now
I want to have it all and I want it now So here we go reload another round implode
We're spinning now until our heads explode

And so I guess we know how far we all can go
We're on a mission to destroy the world we knowLet's go
