

You I Wind Land And Sea

Justin Nozuka

More I need to work
Get up out your head
The sun will soon be rising
The light's no longer red
We walk the street
We ain't got time to play Standing for our reasons
Our time has come at last
To bring it down to bottom
Let the wind show us the path
This time we can see
We ain't got time to play Rising comes the moon and the sun
I'll be alright for now
A thousand buffalo on the run
Stand up and fight for now Over any distance
The sun will disappear
Darkness with its powers
Taking over anything that fears
You plant that seed
The light is on the way Not for another moment
We must not divide
Harmony is what we need
Between both you and I wind land and sea
The light is on the way Rising comes the moon and the sun
I'll be alright for now
Ten thousand buffalo on the run
Stand up and fight for now
Hold my hand I know you're the one
Stand up and fight for now
The rising of our generation
Stand up and fight for now
