

# Share It With Me (Smile Future Remix)

## Family Force 5

[Verse 1:]

I really need to see her tonight  
I made the reservation for two  
Going over in my head how to make her mine  
She's crying 'cause she feels confused Maybe she needs some space  
Just a little time alone  
Please tell me face to face [B Verse 1:]  
Now our seven years are gone  
How could this be She was supposed to be the one  
How could she [Chorus:]  
You've already broken my heart  
I'd like to keep at least one piece  
You can take all that you want  
But you're gonna have to share it with me Share it with me  
Share it with me Share it with me  
Just one piece [Verse 2:]  
I never thought that it'd come to this  
Never in a million years  
The memory of our first kiss  
Is taking me to the verge of tears [B Verse 2:]  
How can I move on  
You were everything to me So where did we go wrong  
This is a tragedy [Bridge:]  
Tears fall to the ground when I think about  
How life goes on without you now  
You broke my heart on bended knee  
Now that you're gone it's killing me I am alone without you  
Never wanted to say that we're through  
Give me your love again  
I won't believe this is the end
