

Time and Time Again

Dusty Springfield

Here we are again, off and on again
Every year just slips away
We keep meeting here, no one else is near
Still there's always more to say I know, you know there's no end
Still I'll always tell you friend, I love you When the night finds us together
Time and time again
When the feeling just gets better
Time and time again Can that moment last forever?
Time and time again She never knows of me
And never wants to see
Sometimes you are in my eyes
Still we'll go home to them Until we meet again
How well we've come to know goodbyes I know, you know there's no end
Still I'll always tell you friend, I love you When the night finds us together
Time and time again
When the feeling just gets better
Time and time again Can that moment last forever?
Time and time again
And the feeling does get better
Time and time again
