Tangled

Green Apple Quick Step

Hanging from the thumbnail of the moon, loosen the tension
Must be kind of unusual, not fair falling short of denial
I'm tied up again, I'm tied upside down again
I looked up again, I must be down, I must be down, I must beHanging from the thumbnail of La Luna, loosen the tension
Satellites and paper chrome, reflecting damage forever
I fucked up again, I must be down, the tide and the stars
They're all tangled waiting for me to find my ground
