

Carry Your Heart

[Taylor Dayne](#)

I hear you calling from the street outside my window
You keep returning just to tell me that you're gone
No need to keep repeating old words lose their meaning
If you can't stay away you don't mean what you sayChorus
You carry you heart
No one to hold all of their weight on your shoulders
You carry your heart
When it gets cold you run to me
You can't carry your heart aloneWhen told you that I wished you'd stay forever
Did it make it harder to remain
Now you lock my love inside you run for cover cause you can't hide
Closing your mind to the love you leave behindChorusEverytime you need a hand to hold
You'll have to give it up to get it back
You'll have to trust me long enough to know
I'll never let it goChorus
