There's the Sun

Kix Brooks

We've been cooped up covered up with snow and rain
This country cabin fever's drivin' me insane
Been a long cold winter for way too long
Waitin' on the bluebird to sing me a song
Mercury's rising and the clouds are partin'
That short skirt walk is already startin'
Them buttercups are popping up towards the sky
These cool Rays are shadin' my eyesThere's the sun
Here it comes
Summertime has begun
Goodtime friends
Where you been
Come on in have some fun
There's the sun
Yeah there's the sunKick back and floatin easy while the warm wind blows
And you'll find us making memories where the cool breeze blows
In the ocean, and the lake, and the swimming pool everybody's all in staying cool
Tappin' your toes and swayin' along
And that ipod shuffle goes to shufflin' songs
Them little bitty bathing suits, lordy lordy
Having us a sunscreen partyThere's the sun
Here it comes
Summertime has begun
Good time friends
Where you been
Jump on in have some fun
There's the sun
There's the sun
