I Know What You Need

Shane Nicholson

It's the fortune in your hand
It's the spotlight where you stand
It's the answer you don't know
It's the space left when you goDon't know what you want
Don't know what you want
But I know what you need
Don't know what you want
Don't know what you wantIt's the traffic in your head
It's the cold side of your bed
It's the place where you belong
It's the words to your favorite songDon't know what you want
Don't know what you want
But I know what you need
Don't know what you want
Don't know what you want
But I know what you needI know what you need
I know what you need
To believeDon't know what you want
Don't know what you want
I know what you need
Don't know what you want
Don't know what you want
It's coming aroundDon't know what you want
Don't know what you want
But I know what you need
Don't know what you want
Don't know what you want
But I know what you needI know what you need
I know what you need
To believe
