India

Eric Benet

I got the biggest part of heaven in my life
And I can feel it every time I see your eyes
You're my world, you're my light
India
If I could, you know I'd open every door
But your own journey makes it mean so much more
I believe in all your dreams
India
Down, you'll never let me down
When you follow your own way
Speak the words only you would say
Keep reaching for your star
It won't be far
When love's behind you
You're the miracle of life that love has made
This bond between the two of us will never break
Your flower blooms, I sing for you
India

You hold the universe inside your little hands
So don't you listen if they just don't understand you
When you try, you always fly
India
Yes, baby
Keep reaching for your star
If won't be far
I'm right behind you
You, yeah
I got the biggest part of heaven in my life
And I can feel it every time I see your eyes
You're my world, you're my light
India
I believe in all your dreams
India
When you try, you always fly
India, yes, you do, baby
