

Let It Burn

Overkill

Here, here, got the lock-down cover me
Fear, fear, got the in to let it out
So near, feel it breathe all over me
Everything is inside, nothing going out I hear you, I see you, I put you out
I hate you, I love you, I burn you down, down, down, down
Got the need, right here to let it out
Got the need, light the match, let it burn Listen here to the fire as it burns up your back
Take your heart, gonna let it burn
Listen here to the fire, let it burn You're sure lookin' tired with a knife in your back
Through your heart, man it gotta burn
Listen here to the fire, let it burn Unclear where to start and where to end
I know what the need is all about
So near I can feel it eating me
Everything's upside, upside down I smell you, I taste you, what you're about
I loath you, adore you to the ground
Ground, ground, ground, ground, ground
Got the need right here to let it out
Got the need, light the match and let it burn, let it burn Listen here to the fire as it burns up your back
Take your heart, gonna let it burn
Listen here to the fire, let it burn You're sure lookin' tired with a knife in your back
Through your heart, man it gotta burn
Listen here to the fire, let it burn I don't seek the answers to the questions that I learn
I don't start the fires, I lay back and watch them burn
I see ashes floating transformed what they used to be
I see ashes floating down they come, they come
They come to cover me
They come to cover me Listen here to the fire as it burns up your back
Take your heart, gonna let it burn
Listen here to the fire, let it burn You're sure lookin' tired with a knife in your back
Through your heart, man, it gotta burn
Listen here to the fire, let it burn Listen here to the fire, let it burn
Listen here to the fire, let it burn
Listen here to the fire, let it burn
Listen here, let it, let it, let it, let it
