Slow Ride

Thief Club

Always
stuck in the middle of never
and it's over and over and no use
I'm all for you
I feel
things can never get better
till we're tangled together again soon
I'm all for you

If I wanna go,
Take a slow ride with you
You know exactly what I'm gonna do
We can get lost on the back roads we knew,
as I breathe you in and out again

I've been
Slowly piecing together
every pattern of weather that comes through
I can conclude (oh)
You make every drop of rain sing
like the radio on my window pain
We can turn it up and make clouds all day
I'm all for you

If I wanna go,
Take a slow ride with you
You know exactly what I'm gonna do
We can get lost on the back roads we knew,
as I breathe you in and out again

Take me anywhere right now
Let the world collapse on its own behalf,
it doesn't need our help
You just take me faraway somehow
We can let time work on our side,
and let all the weight of the world pass by

If I wanna go,
Take a slow ride with you
You know exactly what I'm gonna do

We can get lost on the back roads we knew,
as I breathe you in and out again

If I wanna go,
Take a slow ride with you
You know exactly what I'm gonna do
We can get lost on the back roads we knew,
as I breathe you in and out again
