Doomsday

Six Feet Under

We rise up from the tomb
bloody and covered with worms
today is the day of doom
a hunger for flesh is the cure
rise up from the ground
an army ready to kill
zombified nations of blood
have taken over the the earth... has died
a shallow giant grave
a blood soaked skull
a terror greater than deathtear away the skin
a skeleton exposed to be broken
in the ground, but soon to live
the maggot infested dead
awaken from their rest
to kill againwe kill again to satisfy
our hunger will always be blooddeath is now on its way, waiting to end today
sludge of the human waste, you will have died in vane
a plague has been let loose
sickness within us grows
death is now on it's way, waiting to end todaydoomsday, doomsday, doomsdaydeath is now on it's way, waiting to end todayWe rise up from the tomb
bloody and covered with worms
today is the day of doom
a hunger for flesh is the cure
rise up from the ground
an army ready to kill
zombified nations of blood
have taken over the the earth
