New Age

Subhumans

So you're living in fast world
See the people you've already killed
See what you've done with that machine of yours
You can't justify it, you ain't got a causeChorus:
It's only cos we're living in a new age
You don't know what you're like when you're in a rage
They're gonna put you away in a cage
You better start to act your age
You better start to act your ageVictims running, they are screaming
Living nightmares, they're not dreaming
They're too scared to walk the streets
The one with a gun they're afraid to meetChorusYou know you're killing off the race
They'll lock you away and change your face
Hatred of the new age turned your mind
Can't bear to live with the rest of mankindChorus
