

She Called Up

Crowded House

She called up
And gave me the news
It made me so sad, sad, sad
There was nothing I could do
She's too far away
And you had to leave
I can never repay you now
For what you gave to me
All those who can blow a chasm wide
It took us all, it took us all
Pushed apart the mountains and the tide

It took us all
She called up
And gave me the news
It made me so sad, sad, sad
There was nothing I could do
I was so lost
In delirious sleep
Wasn't prepared for that position
And maybe I was naive

But truth is a mortal blow
You know all there is to know
The hurt that you have so close
Is something better now
When she called
When she called up
And gave me the news
It made me so sad, sad, sad
There was nothing I could do
She's too far away
And you had to leave
I can never repay you now
For what you gave to me
For what you gave to me
She called up
She called up
She called up
And gave me the news
