

# Have Love Will Travel

## Brother Hawk

I heard love and only love can fill the void,  
but I know that love can just as easily become the void.

Well that's just the difference between love you  
find and love you were born with.

I know that I won't ever live without love to give.

I heard love and only love can break your heart,  
but I know that love is all that keeps you hangin'  
on when things get dark.
