Not Human

Septic Insurgent

I see them in my dreams, I see them in my head
in the night, intensive light
they are standing around my bedI beg them "please" but there is no sound
instead I'm floationg above the groundThen they're doing things to me
with some weird machinery
They're not human
They are not like you and me
Nobody believes me, you think I am crazy
why should I tell a lie
when I want to be free?They lock me up in a hospital
fill me up with drugs that explains it allBut I know what I've seen
the scar on my neck proves what I mean
They're not human
They are not like you and me
