

God's Song

Cold

A victim to another level
That no one ever cared about
The way I ease my sufferin'
Is killin' me again I would not prescribe
This feelin' for you
A pain with slow sustain
Like a sad song lives on When the world won't take you back
You know everyone's the same
We're all a part in God's song When the world won't take you back
You know everyone's the same
We're all a part in God's song Can't live with this pain forever
There's nothin' left to talk about
The rain outside is troublin'
It takes me back again If I can't describe
My feelings for you
The game will never change
Like a sad song lives on When the world won't take you back
You know everyone's the same
We're all a part in God's song When the world won't take you back
You know everyone's the same
We're all a part in God's song When the world won't take you back
You know everyone's the same
We're all a part in God's song When the world won't take you back
You know everyone's the same
We're all a part in God's song When the world won't take you back
When the world won't take you back
We're all a part in God's song When the world won't take you back
When the world won't take you back
We're all a part in God's song
