

# Illuminate the Sky

## Martin Halla

I open the door for you, so you don't have to use  
your precious parts my dear, I don't wanna see them bruised.  
Your body's a queen my dear, resting by my side.  
No need to rush away, you're free to take your time.

I wish you'd stay, I wish you'd stay  
so we could enjoy each others space  
not to invade or to degrade, but to illuminate the sky.  
You and I, we'll illuminate the sky.

Oh please can I pour you some wine,  
just to calm you down. You've never looked so fine as in that silken gown.  
I can't stand stands with me, I'd love to see you smile and move, move, move with me  
I'll hold you like a child.

I wish you'd stay, I wish you'd stay  
so we could enjoy each others space  
not to invade or to degrade, but to illuminate the sky.  
You and I, we'll illuminate the sky.

Never again will I let you down, love.  
Never again will u wear that frown, no  
I will make sure that we stay up high, and illuminate the sky

I wish you'd stay, I wish you'd stay  
so we could enjoy each others space  
not to invade or to degrade, but to illuminate the sky.  
You and I, we'll illuminate the sky.
