Love's Not Where Love Should Be

Loretta Lynn

In the past few months all lies have changed we no longer speak each other's name
We turned around and love was gone we don't even know what went wrong
We've been blinded by time you lived your life and I lived mine
Much too late now we see love's not where love should be
[steel]
We worked so hard to build a home I guess we thought that love grew on and on
If we had worked this hard on you and me love would be where love supposed to be
We've been blinded...
Love's not where love should be
