Love 101

Pepper

She called me over wanting some good love
She said, she want the number one rub, oh
I got it hot on the bottom and above
Yes, I can
But soon after I arrived I knocked twice on her door
I knocked again and then once more
Yet somehow I'm still surprised
How could this be?
Alone again tonight
Under the glow of an orange street light
This experiment just can't be right
Love 101, love 101, oh
Dialing me at 4 am, she calls it late night
She said, I'm sorry let's make it right, oh
Let's make the plan for the afternoon

I, I guess I can
But midday here I am waiting on her love
What could I have been thinking of
Looks like I need someone else to rub
How about you?
Alone again tonight
Under the glow of an orange street light
This experiment just can't be right
Love 101, love 101, oh
Alone again tonight
Under the glow of an orange street light
This experiment just can't be right
Love 101, love 101, in love 101, love 101, oh
