# All Yours

## Ludovik Material

There's so many things you'd like to know
You'd like for me to show it all
You want to crawl inside my brain
You want to know my every cell
My every thought, my every step
'Cause you'd like to protect me from myself
But you know it all, 'cause you're everywhere
and you like to have it - total control

You wanna know which things I like
What keeps me sad, what makes me smile
What inspires me to drink so much
and which boy's ass I like to touch
But you know it all, I'm all yours
You've got it now - total control

You wanna know what stuff I read
You wanna know what I believe in
If I'm a threat and if I'm the worst
If there's a nuclear warhead in my purse
And there are a few things I'd like to blow up
Your self-esteem, your mass surveillance
Your faithful servants, your total control

The stars and stripes have shaped the world
The watchdogs - they forgot to growl

You know it all - you got me now
You got me now - I'm all yours
