

# You Lied

## Green Day

You gotta problem you just can't hide  
Compulsive habits that never seem to die  
Your breath is taking up all the air  
Your teeth are rotting to black holes in your head Well reality is due, what you say just can't be true  
When the story's stretched and so far fetched  
That you're lacking an excuse  
You lied Your mother allowed you just one white lie  
But now she's dead and she left you with a problem  
Pinnochio has pierced your tongue  
Your nose is growing into the third dimension Well reality is due, what you say just can't be true  
When the story's stretched and so far fetched  
That you're lacking an excuse  
You lied, oh, you lied
