Delirium and Persecution Paranoia

Nap Eyes

Wanna know what tells me something
When you talk you don't talk to me
When you talk you talk about me
Wanna know what tells me something x2Round the inner core rocks
The outer core flows, the outer core flows
But while the outer core cools
The inner core grows x2
If Lord Sun sent, sent out heat and light
Sent out deadly magnetic radiation
What you gonna do the human race
When the solar wind through the magnetosphere is breaking?Most of us down here lying down for years
Sleeping the night away
Some of us tries but never survives
Stay up whole night and day
My friend once told me
About a rare insomniac's condition
He who sleeps not one minute a day
But feels 20 minutes of blinding pain and blurring visionWhat am I trying to say by way of
Eat with my door in a closed position?
What am I trying to say to you
When I sleep with my door in ajar position?
Where can I get away?
To my lung cave
To find my long, my lonely listen?
Where can I get away, when all I've ever tried and tried
Is not to have to listenBut oh baby all that I really want to know it's just one thing x3
Oh baby all that i really want to know is just aOh baby all I need is just another second chance
oh baby all i need is just another twenty-five second chance
oh baby all I need is just another two-hundred-fifty-second chance
oh baby all I need is just another two-hundred-fifty-thousand second chance
