

Good Thing

Gareth Gates

I was looking for a new direction
You gotta keep moving for you're own protection
Haven't got no love to stay in love, well well, oh You turn the tables on my whole world, baby
You take away all the heartache that love gave me
Can't you see what you've done in my life
And let that pure connection change my whole perception You're the fuel in my fire
My fever runs high
Got me scared of desire
It's a good thing When we come together, you can stop this good thing
No, you can put it out
When we come together, try to stop this good thing
And it will burn you out I'm kinda warming to this new sensation
'Cos everyday is like a revelation
Just show me something like I never knew about me My thoughts cant lead me into no temptation
'Cos baby, you'll give me everything I'll ever need
For you will make a fool out of me
I'll just have to take it, I will never have to fake it You're the fuel in my fire
My fever runs high
Got me scared of desire
It's a good thing When we come together, you can stop this good thing
No, you can put it out
When we come together, try to stop this good thing
And it will burn you out Girl, you got me burning up, got me burning, burning up
And I don't know how to stop, got me burning, burning up
Girl, you got me burning up, got me burning, burning up
And I don't know how to stop, got me burning, burning up Girl, you got me burning up, got me burning, burning
up
And I don't know how to stop, got me burning, burning up
Girl, you got me burning up, got me burning, burning up
And I don't know how to stop, got me burning, burning up There's a fuel in my fire
And it's taking us high
I'm not scared of desire
It's a good thing When we come together, you can stop this good thing
No, you can put it out
When we come together, try to stop this good thing
And it will burn you out When we come together, you can stop this good thing
No, you can put it out
When we come together, try to stop this good thing
And it will burn you out When we come together, you can stop this good thing

No, you can put it out
When we come together, try to stop this good thing
And it will burn you out
