

Hanging On

Venus In Flames

out of the bleu, into the black
if we go ahead, there's no way back
but it's alright, that's alright
make a first move, launch the attack
remember the lines you wanna forget
but it's alright, that's alright

you whisper in my ear,
we might as well get out of here

we could run away together
find a new and live forever girl
you really get me hanging on
we could run away together
find a new and live forever girl
you really get me hanging on

dance in the dark, talk about love
when you realize, it's never enough
but it's alright, that's alright

you whisper in my ear,
we might as well get out of here

we could run away together
find a new and live forever girl
you really get me hanging on
we could run away together
find a new and live forever girl
you really get me hanging on

if you're gonna live or die
you're soon to find out
if you wanna make it last
you better make it fast
put some faith in your heart girl
you know how hard it is in this world

we could run away together
find a new and live forever girl

you really get me hanging on
we could run away together
find a new and live forever girl
you really get me hanging on
and you got me hanging on (x4)
and on and on and on
on and on and on and on

you whisper in my ear,
we might as well get out of here
