Take the L

The Motels

Watching my head, holding my face
One more evening gone to waste
No longer do I know my placeKilling time and missing my cues
Watching her belong to you
Tears could only change my viewTake the L out of lover and it's over
Take the L out of lover and it's overGrowing up has always been tough
Good intentions never good enough
I would take you far away
Do anything to make you stayTake the L out of lover and it's over
Take the L out of lover and it's over
Take the L out of lover and it's overEvery drink and cigarette
All those hands we never met
There are things we should forget
Now it's over, overTake the L out of lover and it's over
Take the L out of lover and it's over
Take the L out of lover and it's overTake the L out of lover and it's over
Take the L out of lover and it's over
Take the L out of lover and it's overTake the L out of lover and it's over
Take the L out of lover and it's over
