Rubik's Cube

Athlete

The world is too heavy, too big for my shoulders

Come take the weight off me now

Thousands of answers to one simple question

Come take the weight off me nowOh, I'm like a kid who just won't let it go

Twisting and turning the colors in rows

I'm so intent to find out what it is

This is my Rubik's cube, I know I can figure it outLost in the playground, late night nostalgia

Open the sky for me now

Friends round the fire outside in December

Open the sky for me nowOh, I'm like a kid who just won't let it go

Twisting and turning the colors in rows

I'm so intent to find out what it is

This is my Rubik's cube, I know I can figure it outCredits roll over the edge of horizons

That I haven't discovered yetOh, I'm like a kid who just won't let it go

Twisting and turning the colors in rows

I'm so intent to find out what it is

This is my Rubik's cube, I know I can figure it outOh, I'm like a kid who just won't let it go

Twisting and turning the colors in rows

I'm so intent to find out what it is

This is my Rubik's cube, I know I can figure it out
