

From the Beginning

Otter Petter

From the beginning nothing was as it seemed
Took the wait off waiting, took the wait off me
From the beginning you put the [afew in front]?
Though it's nothing personal, you're not the only one

Destination, conversation overload
Daydream broke my concentration,
Sent me racing home

From the beginning there was a price to pay
Had to [end your heartless, passionless ways]?
From the beginning I took you to escape
Now the Devil's a-calling my conscience awake

Destination, conversation overload
Daydream broke my concentration,
Sent me racing home

I must be high, I can't deny I can't afford it
No I can't afford it
I must be high, I can't deny I can't afford it
No I can't afford it

Destination, conversation overload
Daydream broke my concentration,
Sent me racing home

I'm missing her, I'm missing her, I'm missing her, I'm missing her
From the beginning, from the beginning, from the beginning, from the beginning
