Signs

The Butterfly Effect

Hold on, decidedly and so
Where the will is strong
The weak won't dare to go
Is this the end of us?
Beginning as we crawl
Is this the end of all?
Beginning as we fall
It's just one kiss of love divine
Here to hide you're lonely
I'm waiting for the end to crawl
Here beside you
Always open
And all of these precious things
Watch over me
Wash over me when I sleep
To find, to fault, to feel
These signs of life
There's something here
Is it real?
Let go, let go of me this time
There hidden down below
And further from my mind
This silence is the darkest hole
Here to hide you, always broken
Watch over me
Only when I sleep
Wash over me
Are you real inside me?
No one will hear me scream
No signs of life
There's something here
Is it real?
To have, to hold to heal
These signs of life
There's something here
Is it real?
Watch over me
There's something
Is it real?

Wash over me
Only when I sleep
