

Vanity

RollerBlue

Went to your house but you weren't at home
I walked alone then I called you on the phone
I went to bed but I couldn't sleep
Tricked again and I'm in too deep
I walked outside cos the air was cool
Said to myself do you take me for a fool
I stepped inside and there you were
Was about to speak but then you looked in the mirrorChorus
Didn't you watch the video, it looked like you in cameo
It's true now everyone can see, that you're just lost in vanityI went outside and watched the stars
Trying to figure out who you are
You played some music from your past
Which made me think this is not going to last
We drove out to the latest place
People stared as we found a space
Tried to make some conversation
You started to speak but then you looked in the mirrorChorusYou talk about your fragility
Just like you've lost your virginity
Guess you missed my message then
Guess you missed againChorus
