

Crazy Glue

[Naia Kete](#)

If I write my thoughts down on this page
I figure someday I might say these things to you
 You got me tangled up inside
 And now I'm listing reasons why
 This love is true

 And I think I'll let me feelings fly
 And I'll watch them make their way
 As we kiss every fear good-bye

Cause I get high when you hold my hand
 You know you do all that you can
 Just to make me understand
 The way you love me
 And I notice what you do
 And I will stick to you like crazy glue
 It's all your fault I'm caught up in
 The way you love me

If I were to sing you something new
Than would I turn gray skies to blue
 So you could see
 I'd do anything to make you smile
 And you'd know it's all worthwhile
 From the melody

Cause I get high when you hold my hand
 You know you do all that you can
 Just to make me understand
 The way you love me
 And I notice what you do
 And I will stick to you like crazy glue
 It's all your fault I'm caught up in
 The way you love me

Sometimes words get lost within our minds
 So difficult to find
 But I am gonna say them anyway

Cause I get high when you hold my hand

You know you do all that you can
Just to make me understand
The way you love me
And I notice what you do
And I will stick to you like crazy glue
It's all your fault I'm caught up in
The way you love me
It's all your fault I'm caught up in
The way you love me
