

Through My Eyes

In Flames

You did me wrong and I applauded you
I became the blade and I pierced through
Now hiding from the world outside
Trying to create magic for the pacified You never felt the answers
Are aimed at you my friend
Did you find yourself lost
In the world we swore to protect If you could see it
If you could see it through my eyes
Why are we so different?
Want you to feel it
Want you to know what it was like
Then maybe you'll understand You always did prefer to keep me on distance
So no wonder it's You never felt the answers
Are aimed at you my friend
Did you find yourself lost
In the world we swore to protect If you could see it
If you could see it through my eyes
Why are we so different?
Want you to feel it
Want you to know what it was like
Then maybe you'll understand If you can see it through my eyes
If you can see it through my eyes You never felt the answers
Are aimed at you my friend
Did you find yourself lost
In the world we swore to protect If you could see it
If you could see it through my eyes
Why are we so different?
Want you to feel it
Want you to know what it was like
Then maybe you'll understand If you could see it
If you could see it through my eyes (through my eyes)
Why are we so different?
Want you to feel it
Want you to know what it was like (it was like)
Then maybe you'll understand (then maybe you'll understand)
