

Marvel

Sunny Lax

Yeah, word

These bitches be buggin' God
Reason why ain't got nuttin' to do with nuttin'

Yeah, check it out y'all one two

We back up in this joint, what?

Check the fly shit, yeah

Don't black out on me

Yo, black man watch out, she salt-water trout

Al Deuce dug her back out, inside the dugout

Heard the pussy was good, big niggaz fell victim

Mentally stripped 'em one God turned Christian

She know magic, soakin' wet pussy on the mattress

Skin like Cleopatra's, the leading actress

She been fuckin' since we went to fourteen, look at Miss Thing

With a ponytail kept a jar of Vaseline

She's a big girl now, with a body that growl

Likewise murder trial, smile attract crowds

Most niggaz, would light the Lord over this broad

Big niggaz in they drawers pose one knee on the floor

Little kids daydream of humpin' wildflower

Hanna Barbera faint, I'm ridin' no Rivera

Fat-ass whips big asses, colorful lips

Wide hips, baller kits, chrome dipped wearin'

Blue kicks, plus jeans boomin' beats

Loud horn beeps, crowded streets, the fusion yo

The heat is on, never too black or too strong

In one hour Wu-Tang Clan is about to perform

Police barricade, sidewalk crowded like parades

The arena now present, de event of the decade

Long braids and fades, bald heads, spangle waves

Extensions, nails Friday, just got paid

Headliner or marquee is the prime time rhyme crime family

That shines Godly light

Upon this hip-hop art form, yo Dunn

We can't be measured by no chart, the God brung

Never bust premature for sure

You want it raw, let me plant my dynamite bitch

Deep inside your core

The explosion stops the menstruation
'Causes stomach inflation
Patiently waitin' nine months for deportation
Of the Earth from the Moon, black woman stay in tune
Yo God, let me pour y'all the science about the womb
It's a black hole for those who lose control
Fertile soil before you are wise
And spoiled many men and took many lives
And all you brothers changed sides
Only worth a decimal compared to those who died inside
