

Just Like Me

Paramore

I slipped down the stairs
Tripped over your fragile ego
I slid down the whole way
Right into the web you'd woven[Chorus:]
And you never said
That you meant to save someone
Somebody just like me
And you never told me
That you wanted to love someone
Somebody just like meYou locked all the doors
You felt it was safer that way
You put up the walls
And now your whole world is caving in[Chorus:]You swallow your pride as
Your left behind
Counting stars to name your lies
You let the rain push you away
And now your drowning in the waysYou never said
That you meant to save someone
Somebody just like me
You never told me
You wanted to love someone
Somebody just like meAnd you never told me
That you wanted to love someone
Somebody just like
Somebody just like meAnd you never said
That you meant to save someone
Like meSomebody just like me
